

Wireless Innovations for the Production Floor

Call Station Module

Features & Specifications

Model: CS120/130 – Wireless 4 Button Call Station

Mesh Technology – CS120 Battery / CS130 Powered

Features

Completely Wireless Communication

Designed to Withstand Production Floor Environments

Captures Response Time / Total Incident Time

Communication Path for Each Individual Button Is Programmable

Up to 1000 Modules can be on one System

Specifications

Size" 6.7" x 4.8" x 2.2"

Weight: 1 lb

Separate Alarms/ Monitoring Points Supported: 4

Power: Battery [24 VDC Power Convertor – Extra]

Programming: Using Front Buttons

Transmitter Transmission Frequency: 900 MHz Spread Spectrum Mesh Technology

Number of Integrated Stack Lights Supported: 5, with one light dependent on other lights alarm state

Switches: Sealed membrane switches

Housing/ Enclosure: NEMA 4

Installation: Hook & Loop [30 Lb Pull] Hard Surface
